und system for processing customized reward offers

Brief Summary Paragraph Right (3):
Reward accrual programs promote usage of a credit card account by rewarding a card holder for account usage with either rebates or redeemable program points. In such programs, account usage is typically measured as a function of either total charge volume or total revolving credit. Generally, card holder performance is measured monthly, and rewards are distributed based on the monthly measurements.

ţ

predefined level of performance. The predefined performance levels are selected by a sponsoring company, and the rewards are limited to credits to the card holder's account. The invention disclosed by the '372 patent is al. The '372 patent describes a system for processing and distributing rewards based on a participant's achieving a Brief Summary Paragraph Right (11): A system and method for administering a tiered reward program is disclosed in U.S. Pat. No. 5,025,372 by Burton et constrained by the same shortcomings as other conventional tiered reward programs.
